## BAILY NUISANCE THE PAN-AMERICAN

A Simple Remedy Which Will Interest Catarrh Sufferers.

In its earlier stages catarrh is more of a nuisance than a menace to the general health, but sooner or later the disease ex-

whial tubes and surfaces

nucous surfaces.

A new remedy which meets these requirements and which so far has been remark-bly successful in curing catarrh is Stuart's

ably successful in curing catarra is studied Cararra Tablets.

These tablets act upon the blood and mucous membranes only. They can hardly be called a secret patent medicine, as they are composed of such valuable remedies as Sanguinaria, Hydrastin, Eucalyptol and similar cleansing antisepties, which cure by eliminating from the blood and mucous surfaces the catarrhal poison.

Stuarr's Catarrhal poison.

Stuarr's Catarrhal poison.

Stuarr's Catarrhal poison internally, allowing them to dissolve slowly in the mouth. In this way they reach the throat fances and the entire alimentary canal. If desired, they may also be dissolved in water and used as a douche, in addition to the internal use, but it is not at all neces-

water and used as a douche, in addition to the internal use, but it is not at all necessary to use a douche; a few of them dissolved in the mouth daily will be sufficient. However, when there is much stoppage of the nose, a douche made from these tablets will give immediate relief, but the regular daily use internally of these tablets will cure the whole catarrhal trouble without resorting to the inconvenience of a douche.

Dr. Bement states "that the internal treatment for catarrh is rapidly taking the place of the old plan of douching and local application, and further says that probably the best and certainly the safest remedy at present on the market is Stuart's Catarrh Tablets, as no secret is made of their composition, and all the really efficient remedies for catarrh are contained in this tablet."

fifty cents for full-sized packages. Ask your druggist, and if he is houest he will tell you there is no safer, more palatable, more efficient and convenient remedy on the market.

#### WOMAN GAVE ROBBER SAVINGS.

Masked Highwayman Visited the

Home of Mrs. J. H. Whitmore. With a robber's hand clutching her throst, Mrs. John H. Whitmore, who lives at No. 1413 South Seventh street, says she was compelled to hand over \$45, the savings of weeks, to a masked man who entered the house just after her husband left the home to go, to a mear-by store at 7:30 o'clock last night.

night.

The man had no weapon, she says, and only a white handkerchief tied about his face was used as a disguise. He seemed familiar with the surroundings, and accomplished the robbery hurriedly. The Whitmores live in rooms on the second floor at the above number, and the entrance is by a back stairway. The robber managed to get in and out of the house without any one seeing him except Mrs. Whitmore, who was so hadly frightened that she was not able to give the police a very good description of the man.

Whitmore is employed at the American

to give the police a very good description of the man.

Whitmore is employed at the American Steel Works in Granite City. It being Saturday night, the robber evidently thought that his victim would have money about the house, but it was not Whitmore's pay night. The money taken constituted the wife's sawings from her husband's allowances, and it was hidden behind a picture, where no one except the wife knew it was. Mrs. Whitmore says she at first handed the man a purse containing is, but that the highway-man insisted that she give him all that she had. Under his threats she compiled.

The woman was not injured by the experience, and besides a nervous shock did not seem to suffer any ill effects.

#### OFFICERS CHOSEN YESTERDAY.

Pan-American Congress Effects Permanent Organization.

Permanent Organization.

Mexico City, Nov. 2.—The Pan-American Congress elected as officers to-day Provisional President Generaro Raigosa, chairman of the Mexican delegation, president; Durale Pereira of Brazil, first vice president, and Balletzar Esturpinian of Saivador, tecond vice president. Senor Carbo of Ecuador, proposed naming Secretary Hay as an additional homorary president, which was done by acclamation.

Former Senator H. C. Davis, chairman of the United States delegation, was nominated for president in an culogistic speech by General Rafael Reyes, delegate of Colombia, but refused the honor.

#### TAKE THEM OUT.

Feed Them on Food They Can Study On.

When a student begins to break down from lack of the right kind of food, there are only two things to do; either take him out of school or feed him properly on food that will rebuild the brain and nerve cells. That food is Grape-Nuts.

A boy writes from Jamestown, N. Y., saying: "A short time ago I got into a bad condition from overstudy, but Mother having beard about Grape-Nuts Food began to feed me on it. It satisfied my hunger better than any other food, and the results were marvelous. I got fleshy like a good fellow. My usual morning headaches disappeared, and I found I could study for a long period without feeling the effects of it. "After I had been using Grape-Nuts Food for about two months I felt like a new boy altogether. My face had been pale and thin, but is now round and has considerable color. I have gained greatly in strength as well as flesh, and it is a pleasure to study now that I am not bothered with my head. I passed all of my examinations with a reasonably good percentage, extra good in some of them, and it was Grape-Nuts that sayed me from a year's delay in entering college.

"Buther and Mother have both been im-

# **EXPOSITION CLOSES.**

At Midnight a Corps of Buglers Sounded "Taps," and the Lights Faded Away.

EIGHT MILLION ADMISSIONS.

Holders of Common Stock Satisfied That the Enterprise Was of Vast Benefit to Buffale.

Buffalo, N. V., Nov. 2 .- The Pan-Amerian Exposition ended at 12 o'clock to-night. At midnight President John G. Milburn pressed an electric button and the lights in the famous electric tower grew dim for the last time. Slowly one by one the lights on post and pinnacle and tower faded away. A corps of buglers standing in the page of the nostrils, irritation in threatcausing coughing successing, gagging and
frequent clearings of the throst and head.
The usual treatment by local douches,
stuffs, salves, etc., often gives temporary
relief, but anything like a cure can only be
obtained by a treatment which removes the
way to be a treatment of the t tower sounded "taps," and one of the will be of great value to the commercial interests of the country. The primary object of the Exposition was to advance the friendly relations and commercial inter-course between the United States and the other countries of the two Americas. In this respect it has been a decided success.

The financial loss will be in the neighbor-hood of \$3,000,000. The statement to be issued by the officers of the exposition, setting forth the expenditures and receipts, will be made public some time this month. Until then the company will make no

Citizens Satisfied.

The loss will fall upon the holders of the common stock, the holders of second mort-gage bonds and the contractors who erected the buildings. Two hundred and ten thousand shares of common stock were sold at \$10 a share. The stock was subscribed for by the citizens of Buffalo and the Niagura frontier, in small lots of from one share to 100, so that the loss will not be seriously felt by any one. No complaint has been heard from the holders of common stock, who appreciate the benefit the

cxposition has been to the city.

There is also a feeling of satisfaction that the enterprise was carried to a successful end by the citizens of this city without State or Federal aid. The first mortgage State or rederal aid. The first inortgage bonds, amounting to \$2,500.000 will be paid in full. An issue of \$500.000 second mortgage bonds is unprovided for, but the revenue from salvage on the buildings and from other sources will probably cover a part of this indebtedness. The balance due to con-tractors is not definitely known, but it is said that it represents their profits for the work done, and no one will be seriously em-barrassed by the loss.

Two Discouraging Incidents.

The total number of admissions for the six months was close to 8,000,000. An average of 2,000,000 a month had been figured on by the exposition officials. The great snowstorm of last April was a severe blow to the exposition. An immense amount of the expositioin. An immense amount of work was undone, and work on the grounds and buildings was delayed for a week. Strenuous efforts were made to make up the lost time, but on May I a vast amount of work remained undone, and the formal opening of the exposition was postponed unng of the exposition was postponed un-

opening of the exp til May 20.

The lamentable tragedy in the Temple of The lamentable tragedy in the Temple of a be-The lamentable tragedy in the Temple of Music, which robbed the nation of a beloved President, was another blow to the Pan-American. The attendance had been increasing steadily up to the date of the assassination of President McKinley. The gates were closed for two days, and when they reopened there was a drop of 12 per cent in the attendance, and no improvement followed. ment followed.

### SEARCHLIGHTS TO BE PLACED IN LAGOONS AND CASCADES.

Unique Electrical Display Planne d for World's Fair Water Effects-Facades of Buildings Fronting on Grand Court Are to Be Illuminated by Immense Lamps on the Monumental Towers.

GREENSWARD FOR BANKS; RED GRAVEL FOR THE PROMENADE.

Artistic and utilitarian effects of the Ex- gateway to the Exposition and by other have been thronged with the curious. position were discussed yesterday by Isaac S. Taylor, Director of Works. He announced definitely that the illumination of the World's Fair site would be taken up Monday by the Grounds and Building Committee, when the problem of supplying electricity would be considered. The question beore the committee is whether the Exposition company will build its own plant or

The promenades of the Fair will be constructed of red gravel and clay to be obained from extensive beds seven miles west of the site. It will be transported by rail to the grounds. The material amalgamates when laid and rolled, and Director Tayfor says that it makes the finest hard walking surface in the world. It is heavily impregnated with iron and presents a solid yet elastic surface. The red color of the walks will contrast harmoniously with the lighter shades of the buildings, and make a far superior walk to those used at the Chicago fair and the Pan-American Ex-

position An effect which the Director of Works expects to create a sensation is the plan of lighting the cascades and lagoons at night. Powerful search lights, placed behind the cascades will send their rays through the body of running water, revealing every vagrant caprice of the falling spray. For the irst time at an exposition this novelty will be introduced. European water illumination has been confined to casting of search lights on the water. No colored electric rays will be used. Mr. Taylor says that the pure white light is far more effective and beau-

The facade of the great crescent peri-style in front of the Art building will be shown in the darkness by the agency of search lights situated in the 400-foot towers of the Mines and Liberal Arst building three-quarters of a mile distant. The long grand court are to be brilliantly illuminated by search lights located on the monumental

lights placed on the cornices of the build ings themselves. One series of lights wid illuminate its sister structure across the

The treatment of the banks of the lagoor system and the grand basin departs entire ly from other expositions. Instead of formal plers and lagging, covered with staff in imitation of masonry, greensward will slope from the edges of the promenades to the level of the water. The natural set ting is to be followed throughout the entire bank inclosure, except where it must be interrupted by approaches to bridges and balustrades. The banks will also be re-

Some of the color effects to be used it the mural decoration of the buildings are coming out in the general scheme of ornamentation. Delicate blues and French grays will predominate on the walls, which are half masked by the white pillars of their colonnades. This treatment has been se lected for the shadow and coolness that it will afford in the hot season, when the Fair will be at its height. No glaring tints of oversufficiency of color will be permitted, as was the fatal mistake in the Buffalo

The pumping plant which will convey the water of the lagoons into the reservoir from which the supply for the cascades will be obtained is to cost \$50,000. The water will not be muddy. A gigantic filter will drain all the water used in the cascades and the lagoons. Slightly opaque, it will conceal the depths of the lagoons, and thus add that mystic charm which water conveys. Craft of all descriptions will dot lagoons and afford transportation through the scenes of the big show by this

The approaches to the Art building will not be directly from the grand court, but are designed to gain the building from the sides along the hills contiguous to the cascades and the hanging gardens, which will be unbroken by steps or walks.

FRANK J. CAPITAIN DEAD. Architect Well Known Here Died at

REPUBLIC SPECIAL.

Los Angeles, Cal., Nov. 2.—A brief telegram from Pueblo, Colo., received by a friend in this city Thursday, announced the death of Frank J. Capitain, a well-known capitalist, who died in a private insane asylum at Pueblo, where he had been confined two weeks, having been removed there from the Rocky, Ford. Colo., jail.

Some weeks ago he made an attempt upon the life of his daughter, Mrs. M. A. Loring, and then tried to commit suicide, but failed in both attempts. Capitain made a big reputation as as architect, but his specialty was great grain elevators, and at St. Louis, Mo., he built four, the largest of which cost \$750,000. At the age of 25 he won a contest over five competitors in making plans for the Laclede Hotel in St. Louis.

Hood's Sarsaparilla This great medicine has wrought the most wonderful cures of all diseases depending on scrotula or the scrotulous habit.

### ATTRACTIONS ON THE FAIR **GROUNDS FOR SUNDAY CROWDS**

Grounds Are Marked With Flags, Showing Where the Different Buildings Will Be Located-Meanings of the Marks on the Stakes.

Provided that weather conditions are avorable to-day, the World's Fair man-dependent looks for thousands of visitors at labore a white flag marks the five radial lines running in the general direction of favorable to-day, the World's Fair management looks for thousands of visitors at the Forest Park site. Work done during the last two weeks has aroused great interest, and nearly every day the grounds Last Sunday it was estimated, from the

figures of the Transit company and Parkkeeper Lamar, over 100,000 persons visited the site. The estimates are as follows: Via Delmar division, 31,000; via other street car lines, 15,000; in 20,000 vehicles, carrying on an average of three persons each, 60,000 Total, 106,000. The flugs, stakes and markings on the

site have been a source of considerable speculation to visitors. To the uninitiated the results of weeks of hard labor by the surveyors and engineers indicate nothing. Here is a guide to the principal markings: Any band of cloth, whether red or black, tied about the trunk of a tree means that the tree is likely to be in the way of construction, but is to be saved, even if it has to be transplanted to another portion of the grounds. A black flag above a white

the Lindell Pavillon from the first stake Red and black flags above a white flag mark the crossing of a building line by a radial line. Stakes are driven every fifty feet over the entire site, dividing the site into 11.7% sections, each fifty feet square. On each stake is a letter and two numbers one of the numbers being surrounded by a circle. The letter indicates the distance of the stake from the Skinker road. The number not surrounded by a circle indicates the distance of the stake from Lindell boule-

distance of the stake from Lindell boulevard.

Piles of logs of uniform length and approximately uniform diameter, which are heaped up at several points, are to be used in the construction of log houses for various purposes as a part of the Exposition buildings in the State and foreign section.

The Friede-Blanke Aerial Globe Company formally dedicated its site yesterday with a flag-raising. Several thousand people witnessed the ceremony, and cheered loudly as the Stars and Stripes were cast loose to the breezes. President C. F. Blanke and other officers of the company were present and made short speeches.

The flag was raised on a steel pole, fifty

feet high. It was found while sinking the hole for the flag-pole, that at a depth of seven feet under the surface there exists a stratum of hard fireclay. Engineer Borden was well pleased with this discovery, and stated that it would form an excellent grounding for the foundation of the globe. The permit was secured yesterday to erect the structure.

A letter received at World's Fair head-quarters yesterday from F. Tyron Charles of Paris, France, states that numerous French manufacturers and merchants have announced that they are ready to apply for space at the World's Fair.
